

Information Regarding W4-2 Land Donation

- a) “Buck Lake” Map details the affected area within the overall area of land being donated;
- b) “Vegetation Treatment” Map details all affected areas;
- c) Affected areas furthest east & west are Developer-owned parcels;
- d) ALL affected areas (except much of the eastern parcel) are within our mandated-treatment area permit from SFWMD;
- e) IF we can get a permit exception, we might not have to treat those areas not belonging to us. But, right now, we are out of compliance and changing the permit might not be timely accomplishable.
- f) Gaining ownership of the parcel might be desirable as we have two walkways already existing and there have been requests for other improvements to be constructed on this land.
- g) Also, gaining this land also gives us control of the entire South Shore of Buck Lake from our easternmost developed area to the westernmost area along that shoreline.

Affected area
Red lines are total area being donated

LEGEND

Donated
 = Lygodium

 = Grape vine
