TOTAL ACRES	102.3	Total size (in acres) of all ponds combined
AVG. TREATED ACRES	20.5	Average treated pond area is roughly 20%

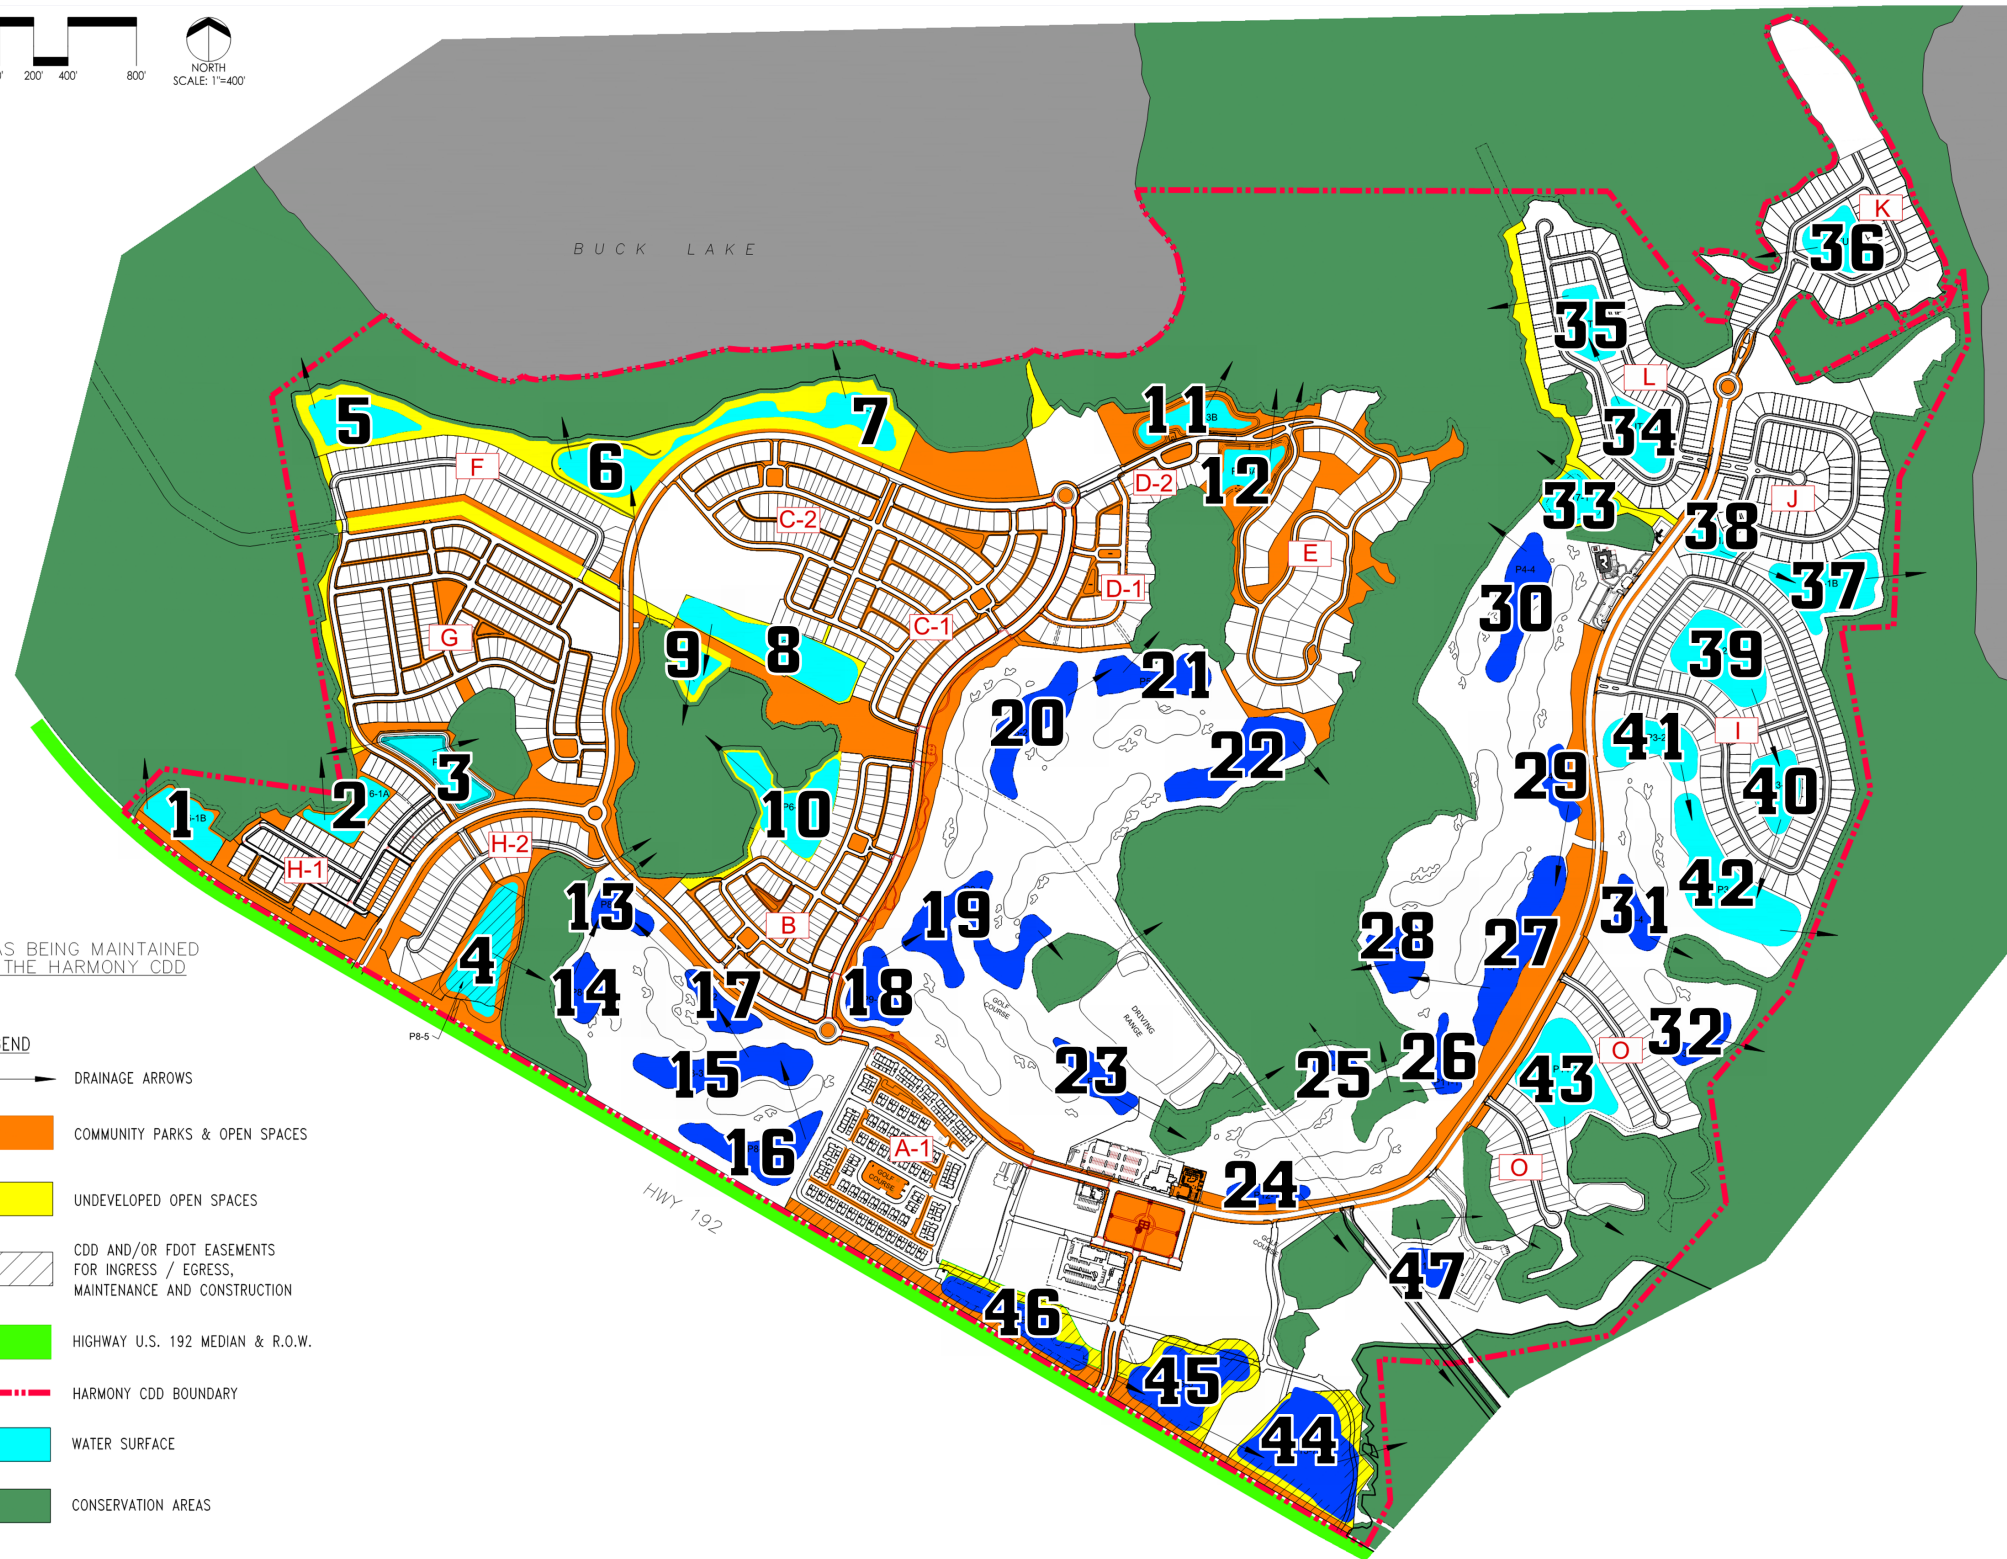

Additional Notes: Ponds are looking good without out having to spray more then once a month. The rainfall really helps to keep the water moving and keeps the algae growth down to a minimum. I have been cleaning trash as it flows out from the constant rain and spot spraying any new tall grass or cattails that I see popping up as they start to prevent any large areas again in the fifty five and older community. Pond 43 between Feathergrass and Middlebrook I have been treating and is getting better as the water has been coming.
