43	<a href="#">Waterside</a>	3.0	L2				Underwater Growth	Citrine 25 gal	
44	<a href="#">DOT [192 - E.]</a>	6.0				L1	Algae	Citrine 25 gal	
45	<a href="#">DOT [192 - C.]</a>	3.6				L1			
46	<a href="#">DOT [192 - W.]</a>	2.0				L2			
47	<a href="#">Maintenance</a>	0.4				L1			

<b>TOTAL ACRES</b>	102.3	Total size (in acres) of all ponds combined
<b>AVG. TREATED ACRES</b>	20.5	Average treated pond area is roughly 20%

**Additional Notes:** Ponds are doing well; mostly treating the normal ponds, with the exception of a few that have had a lot of rapid growth. Been removing debris in & around all ponds, and have driven around ponds to determine what needs treatment, and what the ponds that have been treated look like. Had a few really rainy days which raised the water back up about two inches. Once we are fully in the dryer months, treatment of underwater growth will be more effective; so work on those ponds has been held off for another month.
