

# Exploration Of Website Dependencies

**Gerhard,**

It is my understanding that you deal with the Boat Reservation System ([Geo3.0](#)) on an almost daily basis. Upon looking through the recent proposal from [LightHouse Works](#)® (see Attachment pages 6-8 [A, B, & FAQ]), it was revealed that the “Compliance” of [Geo3.0](#) (or lack thereof) directly affects the Harmony CDD website rating because we depend on the functionality of their software and the accessibility of their website.

Please get together with Steve & determine whether their website (&/or software) has undergone compliance testing; or whether they have had any thoughts/concerns about potential ADA problems. If they are already known to be compliant, then we are golden; if not, then we might face a situation where we are forced to ***fix*** their website in order for ours to be compliant.

Thank you,

**David Farnsworth**
