ANDI

Installation

This page describes how to install ANDI, the accessibility and Section 508 compliance testing tool.   View Table of Contents

Meet ANDI.

ANDI (Accessible Name & Description Inspector) is a free tool to test web content for accessibility.
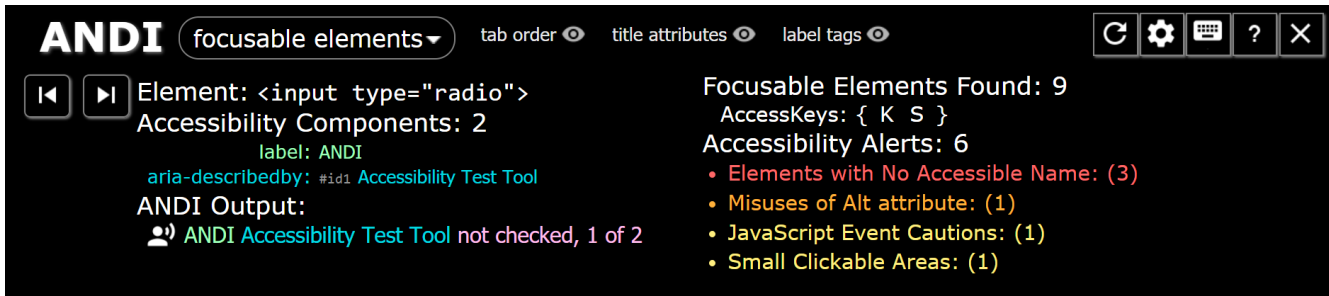

ANDI is a "favelet" or "bookmarklet" that will:

- Provide automated detection of accessibility issues
- Reveal what a screen reader should say for interactive elements
- Give practical suggestions to improve accessibility and check 508 compliance
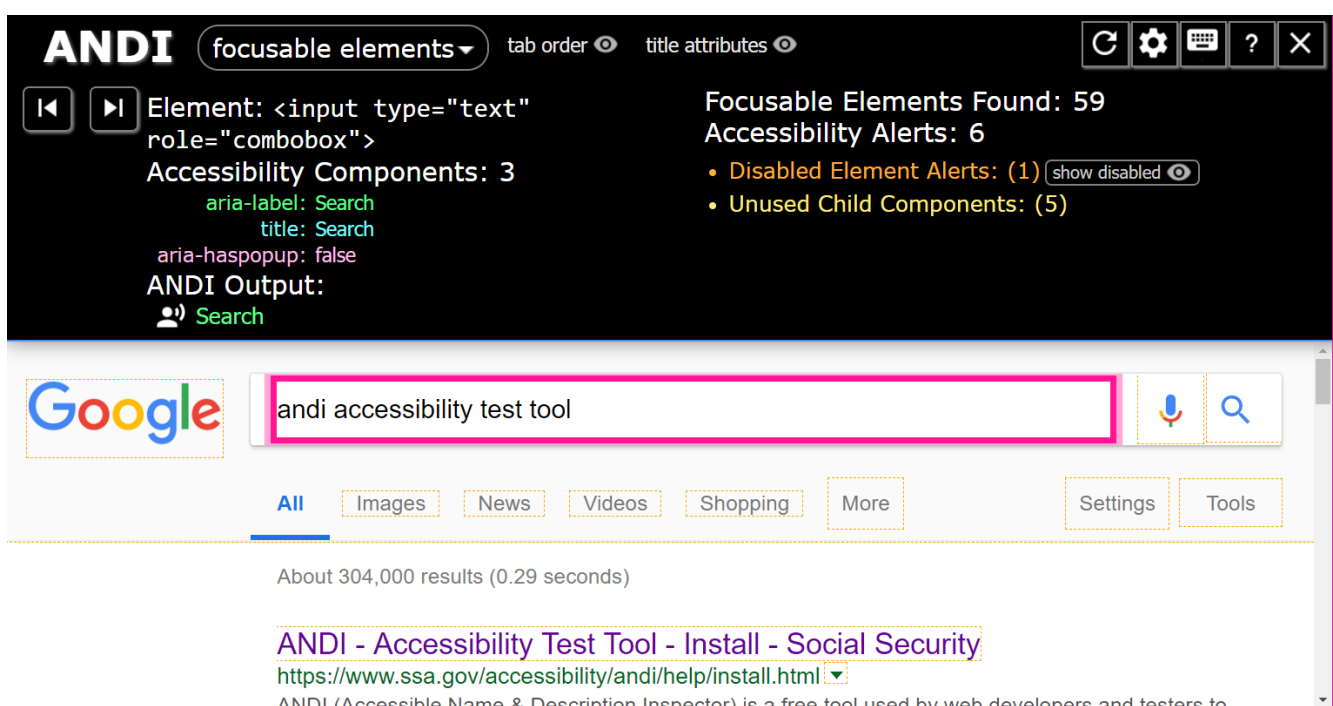

Installation Instructions

Drag and Drop this link: ANDI into your browser's favorites/bookmark bar. 🌐 🦊 🌐 🌐 🌐

Get Detailed Instructions

Launch ANDI

Launch ANDI by clicking on the favorite/bookmark labelled "ANDI" that was added to the Favorites/Bookmarks Bar in the browser's toolbar. ANDI will analyze the test page and appear on the page.

For thorough documentation of all features, visit: ANDI's User Guide. Looking for a site to demo ANDI? Visit our demonstration page.

Benefits Of ANDI

ANDI is like having an accessibility expert at your side, helping you make your web pages more accessible. Use it during development or testing. Whether your knowledge of accessibility is vast or you're just getting started, you, your product, your end users will benefit from the guidance ANDI provides.

Updates

ANDI updates itself automatically; There is no need to reinstall or upgrade.

View ANDI on github to see version history.

How To Uninstall

To uninstall ANDI simply delete the favorite/bookmark that was created in installation.

Open Source on github

ANDI is an open source project created by the Accessible Solutions Branch of the Social Security Administration. The source code is available for contribution on github.

If your organization wishes to host a local instance of ANDI, refer to this guide:
